

AGH UNIVERSITY OF SCIENCE AND TECHNOLOGY

Faculty of Geology, Geophysics and Environmental Protection

Department of Geology of Mineral Deposits and Mining Geology

Kraków, 07 February 2025

Prof. Dr Krzysztof Bukowski
AGH University,
Department of Geology of Mineral Deposits
and Mining Geology

**Institute of Geology and
Geochemistry of Combustible Minerals
National Academy of Sciences of Ukraine**

In compliance with the evaluation requirements of the Ministry of Education and Science of Ukraine, we are sending to the Institute of Geology and Geochemistry of Combustible Minerals of the NAS of Ukraine information on the inclusion of research on brines from fluid inclusions in salts in the lecture course for second-degree (master's) students in Applied Geology at AGH, as well as the significance of such research for addressing many debated issues in salt geology.

Topics covered include, for example, The origin of fluid inclusions in primary, pseudo-secondary, and secondary inclusions; Phase transitions in inclusions and their significance for evaporite minerals; and The importance of inclusion studies in the deposit identification and hydrocarbon extraction industry.

Yours Sincerely

dr hab. inż. Krzysztof Bukowski
